Portofolio

- Palembang Digital Community Website

Palembang Digital Community has the vision to create Talented IT Resources that can compete for the excellent digital field, I've Responsibility for developing the Website Front-end and also Optimize its users' data usage, I Collaborate with UI/UX Designer to accomplish the best practice of Web Apps Design. Using javascript programming language with React JS framework to handle the interactive User-interface Website and also to reduce data usage for the user to access the web front-end more efficiently.
- Infographic Website Balai Jasa Konstruksi 2 Palembang

Build Interactive Infographic Website using JQuery Library, Integrate Golang API to Codeigniter 3, make Infographic data insightful for the user. make dynamic datasets using chart js library, manipulate JSON data from API and integrate them to Chart js Library. Users can download a file based on chart data and also capture it in PNG when the user needs the data from the chart.
- Application Of Guidance Management Final Report For Student Department Of Computer Engineering

This application is an application that can assist the final paper guidance process, with the aim of making it easier for students to carry out guidance between students and lecturers when performing the guidance process for the final paper. Making this application uses the text editor Visual Studio Code, using the PHP programming language and the framework Codeigniter, while the database uses the MYSQL database.
- Curitter Web Apps

Curitter is a website where you can find all information about doctors' practice schedules and online registration places from all hospitals in Palembang. In addition, you can also see various kinds of health articles that can help you improve your health independently. Using PHP programming language to handle the data from the MYSQL database, for the framework I Used Codeigniter to make more sustainable development.
- E-Paper For Sumatera Ekspres

I've responsible for building online paper store Apps and maintenance technical support, in Front-End, Back-end Mobile Development, I built an android application for an electronic paper that uses API to consume the data from the database. Using Flutter Framework to Build Interactive User Interface for Mobile Apps, Integrated the data from a website to our Mobile Apps that use JSON to parse the data.
